

TEACHING IDEA

Use the hand patterns to count to 100 by 5s. The "quilt blocks" can be cut out and arranged into a quilt, grid, or number line that counts by 5s to 100. To have it show all numbers 1-100, have the students write them on the fingernails of each hand.

For instance,

the 5 hand would have 1, 2, 3, 4, 5...

the 10 hand would have 6, 7, 8, 9, 10...

the 15 hand would have 11, 12, 13, 14, 15...

the 20 hand would have 16, 17, 18, 19, 20...

and so on!
